Getting started is easy

Why Healthdom?

Personalized

One size doesn't fit all. Every person's journey to a healthier lifestyle is unique, and it should be treated as such

Engaging

Easy-to-use intuitive design with elements of gamification to nudge behavioral changes that motivate paths to better health

Comprehensive

Our unique 360-degree approach evaluates various factors, such as lifestyle, genetics, medical history, family illness that influence your health and devise an individualized health action plan

Actionable and Measurable

Take control of your health. Measure, track, and understand how day-to-day activities can improve your health

Medical screening

Lifestyle

Environment

Genetics

Why Healthdom DNA test?

Saliva-based test to start at home

Physician test authorization included, real-time tracking of the process, full confidentiality of your sample, and prepaid return shipping label

High-quality Health (ACMG 59) + Ancestry report

11,000+ variants in 59 genes (compared to 1000+ variants in 17+ genes provided by 23&Me). ACMG 59 panel focuses on highly actionable conditions

Translation of your DNA results into actionable insights

Clinical guidelines and sophisticated algorithms to optimize your personalized health action plan

Lifetime secure storage of your DNA sequence

Data available upon request. Elements of blockchain used to store data

Calls with genetic counselors and pharmacists

Video or conference calls scheduled at your convenience. Easy to understand and downloadable reports for you and your doctor
